

## March Photo Contest Judge's Comments "Bridges"

### Judge 1

- 1- Beautiful scene that was ruined by over processing and improper use of color
- 2- Magenta and green colors are nice. Excellent use of leading lines. Power lines are distracting
- 3- Lovely shot. A bit overdone, processing-wise.
- 4- Creative use of silhouetting. Would have preferred person completely silhouetted. Background colors are nice
- 5- A bit of a stretch for the topic but it works. Background is too much in focus and is distracting.
- 6- In this image, the bridge is a very minor element. Faded colors don't work, IMHO
- 7- Creative capture. Effective use of leading line, the road, to take you out of the photo
- 8- Wonderful angle and great reflection. Colors are well rendered.
- 9- Bridge takes the viewer into and out of the image. No need for the date of capture. That is very distracting.
- 10-Nice angle of capture. Use of framing elements works here. Data stamp is unnecessary.
- 11-Creative angle of capture. Image needs more saturation.
- 12-Beautiful European bridge. Image needs more contrast. Not terribly sharp
- 13-Lovely toned image. Nice capture with boat going under the arch. Elements on RHS are distracting and should be removed.
- 14-Pretty bridge that needs more saturation and straightening. Top framing elements are out of focus and a bit distracting.
- 15-A bridge at its simplest. Excellent composition and leading lines. A bit more color or saturation would help here.

### Judge 2

- 1- A little too much post production for me
- 3- it's a beautiful setting but there is too much post processing
- 15-Next time have the board exit the photograph into a corner

### Judge 3

- 13- Great composition.
- 15- Crop the top 1/4
