

September Judge's Comments

Judge 1

- 1- Nothing in the image is sharp. While the taller buildings in the back are interesting, the foreground structures are not.
- 2- Nice capture of the interior of the barn. Wide angle distortion is troubling.
- 3- Well exposed. Might consider straightening the center point of the church building.
- 4- Well composed. Parts of the tower in front might be brighter. Not enough contrast for my taste.
- 5- Lovely colors and composition. Exposure looks good. Things that should be straight are.
- 6- Nice covered bridge scene. Power lines and out of focus plant materials on the right are distracting.
- 7- Nice juxtaposition of old and new. Nothing seems terribly sharp tho.
- 8- Nice street scene ruined by dark shadows. Either shoot this at a different time of day or open up the shadows.
- 9- Wide angle distortion is quite noticeable. Colors are pleasant.
- 10- Black & white rendering is appropriate for the subject. Nothing in the image is straight.
- 11- Unique view of the Sydney Opera House. Has a strong cool color cast to it.
- 12- Composition is nice with trees framing the house. Shadows on the house are severe. Color seems off a bit.
- 13- Interesting location. Fog/Clouds bring nice effect to the mountains in the background. Possibly lacking adequate contrast.
- 14- Difficult time of day to shoot this image. Too much uninteresting foreground. Crop this in a horizontal pano for a better effect.
- 15- Interesting city skyline. Good exposure and contrast. Tree branches on LHS should be removed.
- 16- Beautiful scene. Boat in the background is badly out of focus.
- 17- Pleasant reflection. Composure and contrast are good. Building is not straight.
- 18- Image colors are pleasing. Is this a photo of the mountains in the background, the water in the foreground, or the buildings in the midground?
- 19- Contrast of B&W rendering is quite good. Sky has noise and other technical flaws.
- 20- Well composed capture of the White Dove mission. Building is sharp with a pleasant softness in the background.
- 21- Excellent capture. Nice repeating patterns and leading lines.
- 22- Nice idea to use window as a frame. Structure on LHS above adobe wall is distracting.
